SUMMARY

IT professional with 6+ years of experience in desktop and end-user support, hardware setup and deployment, and software development. Track record as the primary IT contact for a 50+ person organization: troubleshooting hardware and software, installing and maintaining equipment, training staff, and assisting with a point-of-sale system migration. Comfortable supporting Windows, Microsoft Office/O365, Active Directory concepts, video conferencing (Teams/Zoom), ticketing systems, and a range of devices and peripherals. Strong communicator who explains technical issues in plain language. Microsoft Azure Fundamentals (AZ-900) certified.

TECHNICAL SKILLS

Languages: C#, T-SQL, Python, JavaScript/TypeScript, Java, PHP, HTML5/CSS3

Frameworks: ASP.NET MVC / .NET Core / Web API, React, Vue.js, FastAPI, PHP Slim, Bootstrap, Tailwind CSS

Databases: SQL Server (stored procedures, views, LINQ, relational modeling), PostgreSQL, SQLite, Power BI

Testing & Security: pytest, Vitest, PHPUnit, OWASP ZAP (DAST), CodeQL/Bandit (SAST), Playwright

DevOps & Tools: CI/CD (GitHub Actions), Docker, Git/GitHub, Jira, Figma, Postman, Agile/Scrum

Cloud & IDEs: Microsoft Azure (AZ-900, DP-900 certified), Visual Studio, VS Code

SOFTWARE ENGINEERING EXPERIENCE

Team Lead & Full-Stack Developer — *OWP Forum* — *Sacramento State* Oct 2025 – May 2026
Sacramento, CA — *Real-world client project, 8-person Agile team*

- Led an Agile team that built a RESTful API in PHP Slim with four-tier RBAC for a client that trains 14,000+ professionals annually. Managed sprints in Jira with feature branching and PR review workflows.
- Designed a normalized T-SQL database schema with stored procedures for security and performance, OTP email authentication, and custom middleware for permission-based route protection.
- Configured a CI/CD pipeline via GitHub Actions running PHPUnit and Vitest test suites on every push.
- Presented working software to the client at bi-weekly sprint reviews, translating feedback into user stories.
- Built WCAG 2.2-compliant Vue.js frontend components and Figma mockups presented directly to the client. Delivered and handed the project over to the client in May 2026.

QA Lead & Backend Developer — *CalSight* — *Civic Data Analytics Platform* 2025
Sacramento State — *4-person Agile team, 25M+ government records across 12 data sources*

- Built a data validation pipeline in Python processing 4.1M records against Census TIGER/Line geospatial boundaries, identifying 148,000 mismatched records (3.6%).
- Authored 449 automated tests across 70+ files with CI/CD: ruff linting, pytest, ESLint, TypeScript type checking, Vitest, and automated deployment with health checks.
- Implemented SAST/DAST security pipeline (CodeQL, OWASP ZAP). Found and fixed CWE-20, CWE-312, CWE-359.
- Achieved WCAG 2.1 AA compliance: Lighthouse Accessibility ≥ 95 , keyboard nav, screen reader support, colorblind-safe palette (Okabe-Ito), reduced motion support.

Project Lead & Backend Developer — *Medical Web Application* Jan 2024 – May 2024
California State University, Sacramento — *6-person Agile team*

- Led backend development in ASP.NET MVC with C#: role-based authentication, patient records, appointment scheduling, prescription tracking, and secure in-app messaging.
- Designed a normalized SQL Server schema with stored procedures; migrated to PostgreSQL for Power BI reporting, validating data integrity throughout.
- Produced requirements specs, ERDs, architecture diagrams, and use case models. Mentored a teammate on secure coding standards.

PROFESSIONAL EXPERIENCE

AI Solutions Engineer (Contract) — *Drover Insights LLC* Mar 2026 – Present
Remote — *California*

- Designing and developing AI-powered automation tools and internal software for a business consulting firm.

- Built a React/TypeScript analytics dashboard integrating GA4, Search Console, Google Ads, and Meta Ads through Supabase Edge Function API proxies with Claude API-powered insights.
- Building Drover Content, a multi-tenant B2B SaaS on Next.js 16 + Supabase with an async job state machine (retry/backoff, dead-letter handling), four-role RBAC, and Stripe subscription billing.
- Conducting code reviews evaluating structure, functionality, and security.

Computer Tech & Operations Support — *Pool Time Pool and Spa*
Rancho Cordova, CA

Jan 2021 – Jun 2021

- Evaluated proposed software, researched alternatives, and presented recommendations to ownership. Trained staff on mobile tools across a 50+ employee organization.

Shift Manager — *Burger and Cream*
Auburn, CA

Nov 2015 – Dec 2020

- Built a Windows desktop application in C# to automate labor calculations. Produced documentation and trained staff. Assisted with POS system migration and workstation setup.

PROJECTS

GitPulse — *ASP.NET Core 8, React 19, PostgreSQL, Azure, Hangfire*

2025

- Full-stack GitHub analytics platform with OAuth, automated commit sync pipeline via Hangfire background jobs, and a real-time dashboard displaying contributor activity and repo metrics.

SmartTripPlanner — *ASP.NET Core, Blazor, Ollama, Google Calendar API, SQLite*

2025

- Local AI trip planner with an agent loop that researches destinations, validates travel times, and pushes itineraries to Google Calendar. 41 unit tests.

EDUCATION

Bachelor of Science, Computer Science
California State University, Sacramento

May 2026

Associate of Science, Computer Science
Sierra College — Rocklin, CA

May 2024

Certifications: Microsoft Azure Fundamentals (AZ-900) · Microsoft Azure Data Fundamentals (DP-900) · Google — Office of the CISO Institute: Cybersecurity Essentials (2026) · Google — Foundations of Cybersecurity (2026) · Google — Foundations: Data, Data, Everywhere (2026)
