SUMMARY

Full-stack developer with 6+ years of software development experience and a strong background in C#, Python, SQL, and modern web frameworks. Builds production-ready applications, REST APIs, and automation tools across web, mobile, and AI-powered platforms. Comfortable owning projects end-to-end — from database design to frontend — and working in fast-moving Agile teams with real clients.

TECHNICAL SKILLS

Languages: C# (6 yrs), Python (4 yrs), SQL (3+ yrs), JavaScript (2+ yrs), PHP, Java, R, HTML/CSS

Frameworks: ASP.NET MVC / .NET Core, Vue.js, React, PHP Slim, Bootstrap, Tailwind CSS, pandas, NumPy

Databases: SQL Server, PostgreSQL, SQLite — relational modeling, stored procedures, Power BI integration

APIs & Tools: RESTful APIs, RBAC, OTP auth, Git/GitHub, Jira, Figma, Postman, Claude Code, Azure Fundamentals

SOFTWARE ENGINEERING EXPERIENCE

Backend & Full-Stack Developer — *OWP Forum — Sacramento State* Oct 2025 – Present
Sacramento, CA — Real-world client project, 8-person Agile team

- Building a RESTful API in PHP Slim with full CRUD across a four-tier role system (Admin, Moderator, User, Guest) for a client that trains 14,000+ professionals annually.
- Architecting a T-SQL database with OTP email auth and custom middleware for permission-based route protection.
- Building WCAG-compliant Vue.js frontend components and Figma mockups presented directly to the client for approval before implementation.
- Managing sprints in Jira, coordinating an 8-person team via Discord, and attending bi-weekly client meetings.
- Integrated Git version control with feature branching and pull request workflows across the full team.

Project Lead & Backend Developer — *Medical Web Application* Jan 2024 – May 2024
California State University, Sacramento — 6-person team, real client

- Led backend development on a 6-person team; drove the majority of commits across patient management, appointments, prescriptions, medical records, and secure in-app messaging.
- Built a full ASP.NET MVC / C# application with a DAL pattern; designed and normalized a SQL Server schema using stored procedures for performance and security.
- Migrated database to PostgreSQL to support Power BI analytics integration.
- Implemented role-based auth (doctor, worker, patient) with OTP email confirmation.
- Performed functional testing and bug fixes across all modules, validating behavior against documented requirements.

Game Developer (Volunteer) — *Toontown in Unity* Oct 2021 – Nov 2023
Remote — toon.gg

- Shipped Pizzatron 3000, a fully playable multiplayer minigame in C#, and contributed to Match Minnie through development and testing.
- Implemented networking using the Krypton library including distributed objects and data sync to support multiplayer gameplay.
- Modified core game logic, built UI elements for minigames, and handled fixes and improvements across the project.
- Collaborated with the project lead and a distributed volunteer community; coordinated work asynchronously via Discord.

PERSONAL PROJECTS

Discord Voice Word Tracker — *Python, Pycord, Faster-Whisper* 2025

- Captures per-user audio streams in Discord and transcribes speech entirely on-device via Faster-Whisper — no external APIs, no data leaving the server.
- Posts per-user word counts and top 10 most-used keywords to a text channel at session end; designed for privacy-first local deployment.

SmartTripPlanner — *ASP.NET Core, Blazor, Ollama, Google Calendar API, SQLite* 2025

- Local AI trip planner with an agent loop that researches destinations, checks Google Calendar availability, validates travel times, and pushes optimized itineraries directly to your calendar.

- Runs on local hardware via Ollama with tool-calling LLMs; includes a Blazor Server chat UI, REST API, SQLite persistence with EF Core, and 41 unit tests.

Drive Smart — *WordPress, Custom Theme, CSS, JavaScript* 2025

- Static WordPress site with a custom theme teaching defensive driving tips not covered in traditional driver's ed — following distance, highway merging, weather driving, and zipper merging.
- Custom responsive design with CSS variables, interactive dropdown navigation, and mobile hamburger menu. Live at sardella.dev/drive-smart.

X Country Filter — *JavaScript, Chrome Extensions, MutationObserver* 2025

- Chrome extension that filters posts on X (Twitter) by geographic origin, intercepting API data via content scripts to extract and resolve user locations to country codes.
- Supports allowlist/blocklist modes with hidden and collapsed display options; uses MutationObserver for real-time DOM filtering as the feed loads.

PROFESSIONAL EXPERIENCE

AI Automation Engineer (Contract) — *Drover Insights LLC* Mar 2026 – Present
Remote — California

- Building AI-powered automation agents using Claude Code to solve real business workflow problems for small and mid-size clients.
- Providing technical consulting and architectural guidance on software implementation, tech stack decisions, and system design.
- Designing reusable automation frameworks to deploy consistent AI-powered workflows across multiple business clients from a single tool.
- Analyzing client business processes to identify inefficiencies, improve prompt engineering, and accelerate automation deployment timelines.
- Built **Drover Dashboard**: plugin-based analytics platform in React + TypeScript with Supabase, integrating GA4, Search Console, Google Ads, and Meta Ads through Edge Function proxies. Includes Claude API-powered insights, CRM Kanban board, and scheduled reports.
- Built **SmartApply Agent**: automated job application system using Claude AI that discovers jobs across 7 sources, scores candidates 0–100, generates ATS-optimized resumes/cover letters, and auto-submits via Playwright across 6 ATS platforms.
- Includes a web dashboard with Chart.js analytics, Discord bot for approvals and notifications, and IMAP email monitoring with AI-powered recruiter response classification.

Computer Tech & Operations Support — *Pool Time Pool and Spa* Jan 2021 – Jun 2021
Rancho Cordova, CA

- Evaluated and rejected proposed job estimation software after independently assessing workflows; researched alternatives and presented options to ownership.
- Configured GPS fleet tracking for 5–10 vehicles, extracted and manipulated operational data in Excel, and trained staff on mobile time tracking tools.
- Provided Windows technical support and network infrastructure work across 50+ employees.

Shift Manager — *Burger and Cream* Nov 2015 – Dec 2020
Auburn, CA

- Supervised 15 employees across daily operations; handled POS migrations, ethernet cabling, workstation setup, and security camera configuration.
- Built a Windows desktop app to automate labor calculations, cutting manual tracking time significantly.
- Managed vendor relationships and made operational decisions independently during shifts in a high-volume environment.

EDUCATION

Bachelor of Science, Computer Science Expected May 2026
California State University, Sacramento

Associate of Science, Computer Science May 2024
Sierra College — Rocklin, CA
